

WELCOME Börje Sundell!

Toleap Consulting AB was founded in Sweden in September 2016 by Andreas Kuoppa, Per Tägtström and Jan Kuoppa. Since then Roger Lidgren (USA), Jan-Olof Sperle (Sweden), Karl-Erik Olsson (Sweden), Juan-Carlos Rivera (Mexico), Jose Otero (Spain) and Lennart Ringsjö (Sweden) have come aboard. Now we welcome Börje Sundell, Sweden, as the tenth member of the Toleap Consulting Dream Team.

Börje Sundell, service minded, customer oriented, hands-on technical manager and business developer with wide international experience.

Picture1: Börje Sundell, Toleap Consulting Member #010 April 2017

Börje is a real hands-on technician. Uniquely he is also very customer and business oriented. He is always ready to assist the customers with the best services available. Börje has worked in many positions, as a mechanical engineer with process equipment and steel application development. He is most known for his technical and business development skills working with customer support developing customer's products and also their business.

- We have been trying to persuade Börje to join us for some time now and finally he accepted this challenge, says Roger Lidgren, Toleap Consulting USA. It will be great to work with Börje in our dream team.

- In Sweden, almost everybody who knows the industrial business with steel products development probably knows Börje Sundell and understands how much he will contribute to the Toleap Dream Team, says Jan Kuoppa, one of the founders of Toleap Consulting AB.

- Roger, Jan, Juan-Carlos, Karl-Erik, Jan-Olof and I know Börje and the amazing contribution he has made in his former employments, says Per Tägtström, CEO of Toleap Consulting AB.

Picture 2: #009 Lennart Ringsjö, #007 Juan-Carlos Rivera, #005 Karl-Erik Olsson, #008 Jose Otero, #001 Jan Kuoppa, #004 Roger Lidgren, #006 Jan-Olof Sperle, #003 Andreas Kuoppa and #002 Per Tägtström are Börjes colleagues in the Toleap Dream Team.

- I practice “common sense” with useful and practical solutions, say Börje. I know that we have a great offer to our customers and that our services will contribute to our customer’s business results. We will make a positive difference on the bottom line of the income statement.

Picture3: One of Börjes many interests is antique vehicles.

Börjes expertise from the material, the production, the market development and finally the running business care is unique. He has also worked with an incredible variety concerning materials, products, companies and cultures.

Lorries and trucks have been in focus for Börje recently. Reduced weight gives lower fuel consumption relative to payload. But above all the transport efficiency can be increased. This means better transport economy and environmental benefits.

Picture 4: Light weight design of forestry machines is one of Börjes specialities

- In one project, we built a 90-tonne forest timber truck, this is already almost ten years ago, says Börje. We built the final trailer in high-strength steel for strength and low weight. The rig came to weigh about 25 tons, the car was so light that it was difficult to start in the unloaded condition. It was a great success, but there is still many who have not implemented these ideas, and there is always room for further innovation.

Picture 5: Global network is vital for international business. Börje Sundell has experience working in Sweden, UK, Spain, Portugal, USA, China, South Korea, Brazil and South Africa.

- The total global contact net within Toleap Consulting is amazingly huge, says Börje Sundell. Furthermore, we all are excellent problem solvers and solution oriented with a “down to earth” practical approach with also theoretical knowledge.

Picture 6: This old grader is one of Börjes own vehicles.
